Project idea

- Nowadays, there are a lot of **organizations** that accept **donations** from different people.
- It takes **time** and **effort** for people to reach to these organizations so they can donate.
- So, our project idea is to solve this problem by implementing an application that help people to donate in an easier way and notify when there is a new post or event around the corner.

Conclusion to what we have said.

Problems to be solved.

Problem significance

 Our problem is that people spend so much time and effort to reach different organizations that has led to the shortage of the overall amount of donations.

 Other problem is that those organizations do not have the capability to reach large amount of people to help in notifying them with events.

Donator's functionalities

Using own their personal information.

Using email and password.

At any given time, a donator can sign out.

Forget password

An email will be sent where password can be easily reset.

Donator's functionalities

Write a feedback of his own.

Frequently asked questions with provided answers.

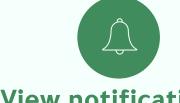

Contact us to solve any problem via email.

Donator's functionalities

Update donator's profile

Any information in profile.

View notifications

Whenever a new place is added, or when there is an event where help is needed.

The upcoming posts where help is needed.

Donator's functionalities

Expand event description

About a specific event with full description.

Apply to a post/event

Through a Google form, a donator can apply to post/event

Filter posts/events

Filter posts based on organization name

Donator's functionalities

By requesting a representative.

View different donations in requests.

Remove donations from requests.

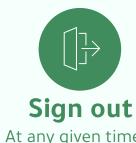

Organization's functionalities

password.

easily reset.

At any given time, a organization can sign out.

Organization's functionalities

Any upcoming post which is then send as a notification to donators.

Update existing post such as event code or details

Remove existing post

Organization's functionalities

Update organization's profile

Any information in profile.

The posts already has been posted.

Expand post description

About a specific event with full description.

Organization's functionalities

View the requests made by donators.

Edit any request's current state.

A pie chart is generated with the data available.

Organization's functionalities

Write a feedback of his own.

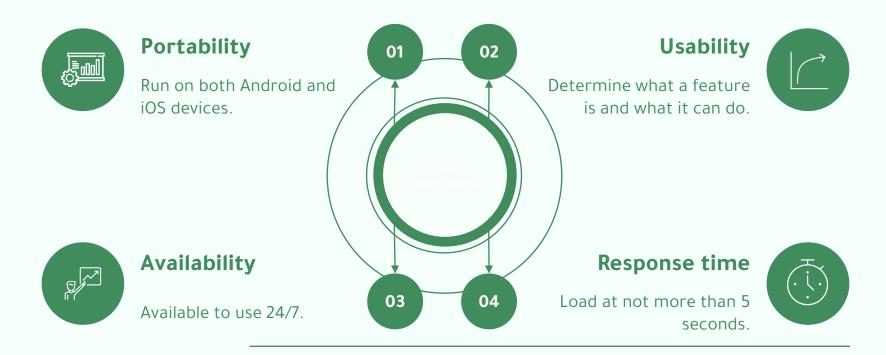

Frequently asked questions with provided answers.

Contact us to solve any problem via email.

Non-functional requirements

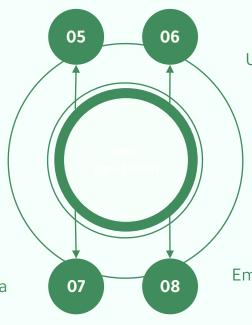

Non-functional requirements

Authorization

Specific email and password is given to organizations.

Authentication

Using Google's Firebase Authentication technology.

Scalability

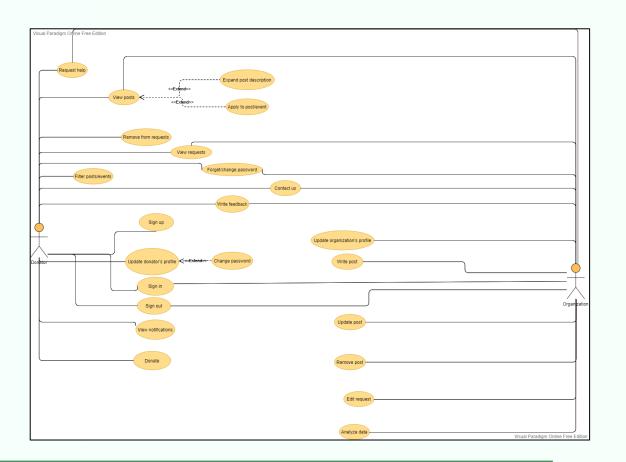

More requests and data can be handled.

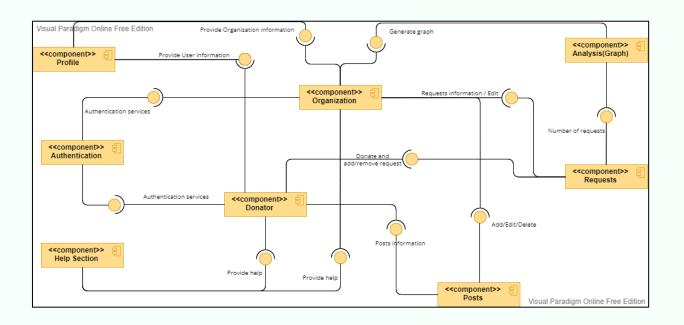

private policy.
